

Do you want to.....

lower your energy bills?

reduce harmful air emissions?

preserve the local environment?

promote sustainability in the community?

Then we need YOUR COMMENTS!

The Town of Red Hook has asked that the Conservation Advisory Council and the Town Energy Consultant make a Climate Action Plan (CAP). The Town has already taken New York State's Climate Smart Communities pledge to reduce its greenhouse gas emissions while at the same time promoting local sustainability and economic development. The CAP is a document that will list different actions residents, businesses and the government can take to achieve these goals.

As members of the community, you will be making this plan come to life, so we need your help! A revised draft of the CAP is posted on the Town and Village websites for you to review. Once you've reviewed it, please give us your thoughts on how to improve it. You can submit these comments by:

- (1) Emailing them to Anne Marie Hirschberger, Energy Consultant, at energy@redhook.org;
- (2) Delivering written comments to your Town or Village Clerk; or
- (3) Mailing written comments to your Town or Village Clerk.

Comments will be received through midnight on December 20, 2011

We Look Forward To Hearing From You!

Any questions can be directed to Anne Marie Hirschberger, Energy Consultant, at energy@redhook.org or 914-422-4126.
