

The Town of Red Hook Highway Department begins its annual street sweeping program on April 3rd. The program is designed to remove the heavy accumulation of salt, sand and litter that has collected over the winter months and to help keep Red Hook's 58 miles of streets clean. The process can take as long as a month or more, weather permitting, and your patience is appreciated. Welcome spring!

Residents are encouraged to rake stones onto the edges of the pavement, spreading the stones in a shallow layer as the equipment cannot pick up piles.

Thank you,

Theresa Burke

Highway superintendent
