

## 2019 FOURTH QUARTER WINTER NEWS LETTER

### WHAT IS HAPPENING IN OUR WATER DISTRICT?

**Pump Control:** We have tried parts replacement in the current radio communication from tank to pump control. Not satisfactory. So we are looking at: A complete replacement of radio system vs cellular communication system. We have been running the pump on a timer. We get some overflow at the tank, but not a lot.

**Well Level Monitoring:** We've been able to monitor the level of only one well for some time. Not a problem because they are in the same aquifer, with same water level. The original measurement system, using compressed air into the well, (called a bubbler), while still operational in one well, cannot be reasonably repaired for the other well. We are expecting a proposal for installation of electrical sensors in both wells, with displays on the control panel.

**Meter Reading:** We have arranged for another meter reader to begin next year. Because we had only two meter readers for the 2019 fourth quarter, we allowed them to start early. So you may have seen the meter readers in late November.

Note:

- Please maintain access to your local hydrant, and to your meter register or meter pit- REMOVE OVERGROWN GRASS, BRUSH, VINES, LEAVES AND SNOW.
- We are updating customer account information.  
Please send your mobile number and email address to:  
[water@redhook.org](mailto:water@redhook.org) \*\* Include your customer number and street address\*\*

**Our Water Operator is VRI Environmental Services, Inc.**

**VRI 24 Hour Emergency Telephone Number 845-677-3839**

**Give your street name and house number for district #1**

**Want to know more about what's going on with your local government? Log into [www.redhook.org](http://www.redhook.org) and click on "Notify Me" to get updates on the topics that you select.**

We hope your holidays were merry and have a happy 2020!  
Hank Van Parys, Water Board Chairman  
Doreen Buono, Secretary
