Two Thumbs Up to Roots Up!

The tree commission is extremely grateful to Eric Rogers, owner and operator of Roots Up in Kingston, NY.

Eric is a graduate of the Stockbridge School of Agriculture at UMass, an ISA Certified Arborist and a NYSDEC certified applicator. His focus is on tree health through soil remediation, root enhancement and biological fertilizing. He is very knowledgeable and eager to answer questions about all topics relating to trees and their care.

Last month he contacted the tree committee and shared that he had noticed the newly planted trees on Pitcher Lane during his comings and goings to clients in Red Hook. He wanted to make a contribution to help the success of the project, and offered to treat the trees with a biological fertilizer consisting of biological microbes and a mix of nutrients, using a vehicle mounted soil injection unit (VMSIU) at NO EXPENSE to us. What a thoughtful, generous offer.

On a rainy, dreary October morning Eric showed up with his equipment and a tankful of biological fertilizer, and treated 34 trees!

THANK YOU, ERIC.
